## IN THIS ISSUE

Primer on process industries  
Warehouse excellence in Europe  
Imagining IEs in five years  
The engineer's gift guide

### Be found

**SPOT**, the world's first satellite messenger, provides safety and peace of mind for anyone who spends time in the outdoors or just wants to stay connected with a dedicated line of communication. Reliable in the water, at high altitude or in a hotel thousands of miles away from home, SPOT sends the user's GPS location and custom messages to receivers over a satellite communications network. Users also have the option to share their travel locations online. With SPOT's connection to Yahoo! Fire Eagle, users can even publish their locations to social networking sites. \$169.99 at [www.findmespot.com](http://www.findmespot.com).

### Spin that ringtone

Be a DJ and play with your phone at the same time. **Make-UR-Tones** by mSpot allows you to use your mobile phones to create customizable ringtones from more than 250,000 songs. To make a ringtone, all you do is choose the song you want using an advanced search and browse engine. Next, choose the beginning and end of the ringtone with the application's easy-to-use waveform editor. Listen to the song while editing and preview the ringtone before downloading the clip to your phone. \$3.49 per ringtone at [www.mspot.com](http://www.mspot.com).

### Brew at home

If you got the shakes when Starbucks announced the closing of 600 of its stores, Technivorm's **MokkaMaster KBT 741** was made just for your daily intake. Hand-built with instruments that ensure the perfect brewing temperature of 200 degrees throughout the grounds-to-liquid cycle, every MokkaMaster is individually tested. This elegant electric drip machine has been certified by the European Coffee Brewing Centre, which means that the water extracts the coffee optimally in every brew. Brew with sustainable coffee from Boyd's Coffee Co. or Eco Café for the ultimate cup. \$265 at [www.roastmasters.com](http://www.roastmasters.com).

### Fresh air

There are hundreds of air filters for small rooms on the market, but perhaps the most compact and attractive one is Peaceful Breeze's **Model 388**. Fitting for its brand name, Model 388 is the color of champagne and oval like one of those plug-in air fresheners. On average, the filter needs to be changed every six months and an optional fragrance cartridge function lets you choose the scent of the room. It's also quiet and energy-efficient. \$59 at [www.peacefulbreeze.com](http://www.peacefulbreeze.com).
