**Confirmation of Approval of the grinder Moccamaster KM4.**

We hereby confirm having tested the Moccamaster Grinder KM4 in accordance with our 'Coffee Grinder Certification Programme'.

The model is able to grind the coffee to fit the filter ground coffee (Norwegian Standard) which is 3500- 5000 particles pr coffee bean.

We emphasise that all written and audiovisual material used for any type of marketing, where either the Seal of Approval or our name are used, must be presented to and approved by us before publishing.

The licensee is required to inform us of all technical alterations on the before mentioned model, as these may influence the integrity of the Approval.

We are delighted to congratulate Technivorm BV with another approved grinder.

Best regards,

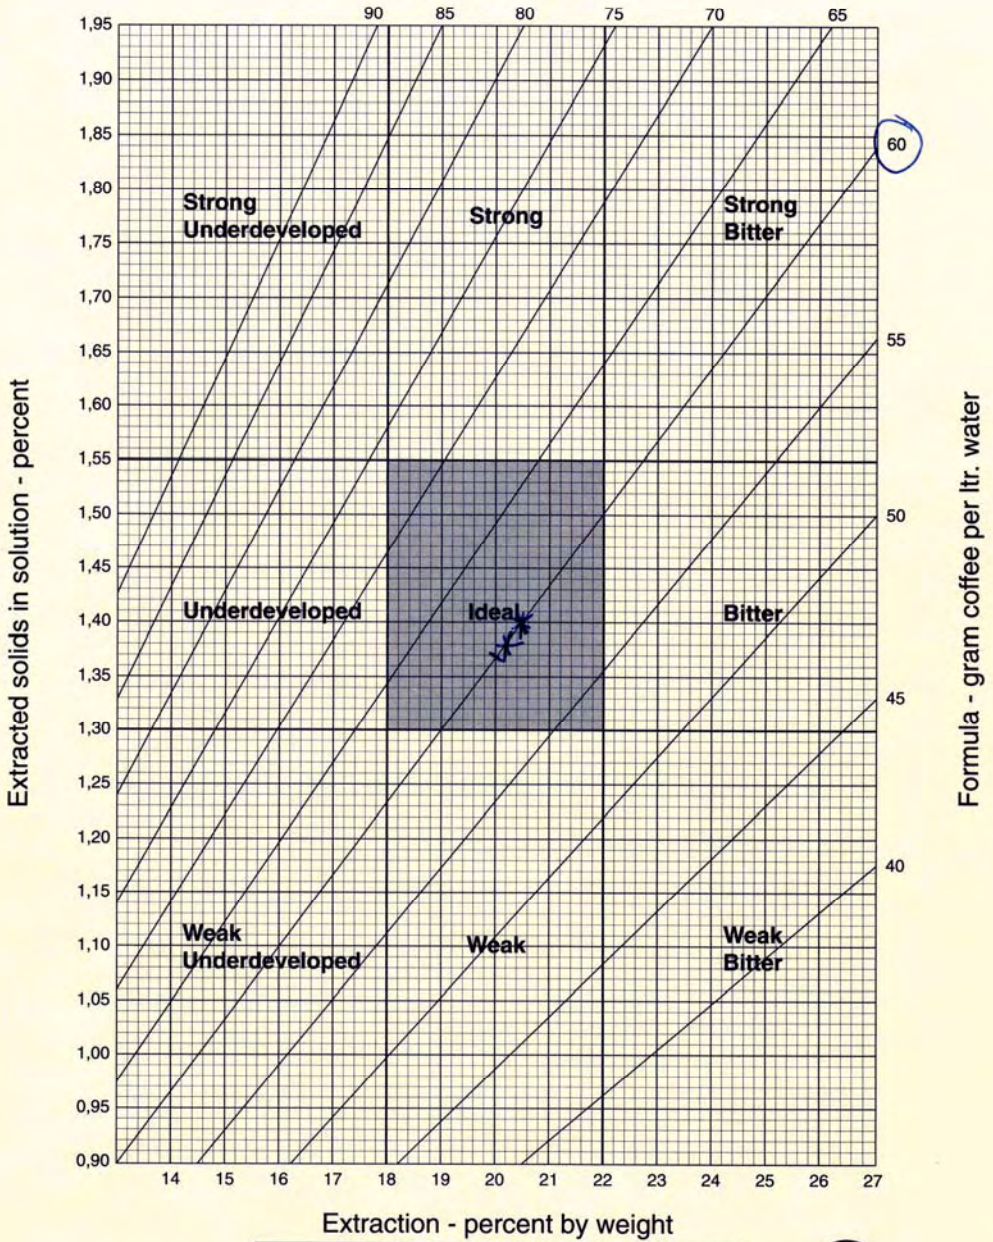

Ole J. Sønstebø  
Consultant for ECBC

# MoccaMaster Grinder KM4 Coffee brewing control chart

Formula - gram coffee per ltr. water

Extraction - percent by weight

This test does not indicate blend quality
